Subject: Meeting Request for VO Toys Site - for 2/7/2020 @10:00 am

Hi Henry:

Happy New Year! As discussed at our last VO Toys Site meeting, we'd like to schedule a meeting with you and the stakeholders in Harrison to discuss the demolition design, roles and responsibilities of all the players (including Emergency Response personnel) and hammer out the procedural details for road closures, traffic routing/control, expediting the permitting process, and handling any other issues that may impact the town. Can you please see if this date works for you all and set up a meeting venue/invitation? We should copy all folks on this email cc list and I think the appropriate people from the following (you and Joan please feel free to correct me here):

- Mayor's Office
- Public Works Supervisor/designee
- Police (traffic control)
- Building Permits
- OEM
- Fire

I think we need decision makers from the entities above so that we can get the answers needed to move forward. And we are trying to have this meeting prior to the February 13 public meeting so that most of the hard questions related to schedule/community impacts can be answered before we go to the public. If 2/7/2020 doesn't work, 2/6 can be an alternate date, but 2/7 is preferred.

Please let me know if this works for you all.

Thanks,

Cris D'Onofrio
